EXTRUSION PROCESS

The Causes of Variation in Extruded Section Weight	1
<i>C.W. Jowett, V.I. Johannes, A. Langille, and W.C. Fraser</i>	
Optimizing Machinability of 6063 Extrudates by Thermomechanical Processing	17
<i>Fan Li, Scott Church, Rich Foote, Randy Wieseler, Mark Hannasch, and Bob Nichols</i>	
PROCESS	
Simulation of Flow of the Billet Surface into the Extruded Product	27
<i>Chris Jowett, Nick Parson, Warren Fraser, Jeff Harkin, and Kevin Hicklin</i>	
Optimizing Extrusion through Effective Experimentation and Analysis	43
<i>Frank F. Kraft and Chad Powers</i>	
Effect of Preheating Practices for Unhomogenized 6063 Alloy Billet on Billet Microstructure and Extruded Properties	51
<i>Malcolm Couper, Mark Cooksey, Natalia V. Danilova, and Ji Yong Yao</i>	
Extrusion Defects – Helping the Customer to Solve Them!	61
<i>T. Ram Ramanan, O. Allen Huff, and William L. Phillipson</i>	
QUENCHING	
Quench Sensitivity of 6063 and 6082 Aluminum Alloys	73
<i>Stanislaw Zajac, Bo Bengtsson, Christer Jönsson, and Anders Isaksson</i>	
Taper Quenching, A Case Study	83
<i>David Jenista</i>	
Smart Quenching	89
<i>Adam Cramlet, Brian Henz, Bryan Pearson, and Steve Covey</i>	
FLOW AND MODELING	
Numerical Simulation of the Extrusion of Complex (Hollow) Profiles	99
<i>B.J.E. van Rens, W.A.M. Brekelmans, and F.P.T. Baaijens</i>	

An Evolution- and Biology-Based Approach to the Optimization of the Extrusion Process	109
<i>Željko Lozina, Igor Duplančić, and Jere Prgin</i>	
Modeling Mg₂Si Dissolution in an AA6063 Alloy During Preheating to the Extrusion Temperature	119
<i>J. van de Langkruis, N.C.W. Kuijpers, W.H. Kool, F.J. Vermolen, and S. van der Zwaag</i>	
3D FEM Simulation of Thermal and Mechanical Events Occurring During Extrusion Through a Channel-Shaped Die	125
<i>Tapas Chanda, Jie Zhou, and Jurek Duszczyk</i>	
Semi-Empirical Modeling of Multi-Hole Extrusion on a 5000-Ton Indirect Extrusion Press	135
<i>W. van Rijswijk, T. Sheppard, and L. Tack</i>	
Material Flow and Prediction of Extrusion Pressure when Extruding Through Bridge Dies Using FEM	141
<i>Isaac Flitta and Terry Sheppard</i>	
FE-Analysis of Inward Flow of Surface Materials at the Back End of Billet During Al-Extrusion	149
<i>Jin Hou, Bo Bengtsson, Ulf Ståhlberg, and Håkan Lindqvist</i>	
Physical and Numerical Modeling of Billet Upsetting	159
<i>Alexander R. Bandar, Leonard Negvesky, Wojciech Z. Misiolek, and Pawel Kazanowski</i>	
New Hollow Extrusion of High Strength Al-Mg-Si-Cu Alloy	167
<i>Hideo Sano and Hideyuki Kondo</i>	
Multipurpose Friction-Assisted Indirect Extrusion (FAIE) Technology	177
<i>Vadim L. Berezhnoy</i>	
On the Mechanics of Friction During the Extrusion Process	197
<i>Isaac Flitta and Terry Sheppard</i>	
Theoretical and Experimental Analysis of Seam Weld Formation in Hot Extrusion of Aluminum Alloys	205
<i>Mirosław Plata and Jan Piwnik</i>	
Simulation of the Effect of Tooling and Billet Condition on Bulk and Surface Metal Flow During Extrusion	213
<i>Richard Thackray, Richard Dashwood, and Henry McShane</i>	
METALLURGY	
Effect of Die Design on Microstructure of Extruded Aluminum	225
<i>Steven R. Claves, Wojciech Z. Misiolek, and Richard M. Kelly</i>	

Crystallographic Analysis of Deformation Zone in 6xxx Aluminum Alloys	233
<i>William H. Van Geertruyden and Wojciech Z. Misiolek</i>	
Effect of Large Plastic Strains Accumulation on Aluminum Structure and Properties	241
<i>Maria Richert and Jan Richert</i>	
A Review of New Approaches and Technologies in Extrusion Welds Related to the Background of Existing Knowledge	249
<i>J. (Koos) van Rijkom, P.H. (Henk) Bolt, and Dieter Weeke</i>	
The Effect of Extrusion Conditions on the Surface Properties of AlMgSi (6063) Hollow Sections	261
<i>Igor Duplančić and Jere Prgin</i>	
A New Metallographic Technique to Reveal Grain Structure in 6000 Aluminum Alloys	273
<i>Fan Li and Patrick Larour</i>	
Temperature-Speed Parameters in Extrusion of Thin-Walled Sections from Aluminum Alloys	277
<i>Wojciech Libura, Jan Richert, Jaroslaw Pacanowski, and Julian Senderski</i>	
HARD ALLOY	
Extrusion of 2xxx & 7xxx Alloys	281
<i>Bill Dixon</i>	
Optimal Conditions for Extrusion Processes of Aluminum Alloys in Mushy State and Composites in Mushy-Solid State	295
<i>Jan Richert, Jozef Zasadzinski, Maria Richert, and Jan Kusinski</i>	
On the Relationship between Extrusion Conditions, Mechanical Properties, and Surface Acceptability in Some Hard Aluminum Alloys	307
<i>Terry Sheppard</i>	
Sources of Blister in 7075 Thin Gage Extrusion in Fabrication	323
<i>Pradip K. Saha</i>	
PROCESSING SPECIAL MATERIALS	
Extrusion of Shapes and Tubes in Dissimilar Alloys	337
<i>Rafail D. Chtcherbel and Ekaterina R. Korjavina</i>	
Extrusion of High-Performance Shapes out of Hard Deformable Aluminum Alloys by Friction-Assisted Extrusion Method	343
<i>Valery N. Shcherba, Vladimir V. Ovechkin, Vladimir N. Alferov, and Michael G. Spichak</i>	
Extrusion of High-Hot Strength Aluminum Alloys Produced by Powder Metallurgy	357
<i>Ulrich Winsemann and Klaus B. Müller</i>	

QUALITY CONTROL BIAS

- Minimal Attainable Wall Thickness in Aluminum Extruded Sections** 365
Józef Zasadziński, Wojciech Libura, and Wojciech Z. Misiolek
- Effect of Chemistry, Extrusion Speed and Temperature, Die Design on Recrystallized Layer Thickness in Extruded Aluminum Alloy 6061** 371
Henry S. Yang
- Thermal Cycle Simulation of 6xxx Aluminum Alloy Extrusion** 381
William H. Van Geertruyden, Wojciech Z. Misiolek, Richard M. Kelly, and Greg G. Lea

EXTRUSION EQUIPMENT

- Implementation of Temperature Measurement and Control in Aluminum Extruders** 387
M. Pandit, S. Baqué, W. Deis, and K. Müller
- Intensive Cooling of Light Metal Alloy Extrusions by Air and Water** 397
Carl Kramer
- High-Performance Cooling for Large Aluminum Sections – Industrial Application of a Compact Combined Air-Water In-Line Quench** 409
Johan Vanhoutte and Werner Strehmel
- Tool Steels and Design of Modern Light Metal Extrusion Containers** 417
M. Herder and J.P. Hellenbroich
- Managing Extrusion Plant Maintenance** 425
Al Kennedy
- PRESS**
- Manufacture of a Four-Part Container for a 13,000 T Extrusion Press** 433
Herbert Wagner, Karl-Heinz Schonfeld, Reiner Meilgen, and Theo Dincher
- Objective Examination of Converting a Long Stroke Aluminum Extrusion Press to a Short Stroke Type** 441
James M. Pope
- Extrusion Press Total Control System** 445
Akira Yamada
- Presses Operating with Tandem-Mounted Cylinders** 449
Josep Maria Benito
- Extrusion Press Alignment with Modern Technology** 455
Joseph E.V. Mulder and Gavin J. Smith
- A Low Energy, Reliable, Electro-Hydraulic System for Extrusion Presses** 465
J.G. Stott and B. Wilkins

POST PRESS

Semi-Continuous Aging Oven 469
Massimo Marinelli

New Aging Furnace Designed for Improved Quality and Increased Production 473
Bruno Mancini and Carl Kramer

**Power Consumption Control: A New Temperature Control System
for Aging Furnaces and other Chamber Furnaces** 479
Eckehard Fiedler

Improved Layout and Handling Downstream of the Extrusion Line 485
Francesco Gramaticopolo

CONFORM

Practical Experience with Castex 489
Philip M. Thomas

Extrusion Zone Gap Measurement and Control of the Conform™ Process 495
*Kafeel A. Khawaja, Martin J. Smith, Brian Maddock,
Lakmal D. Seneviratne, and Michael P. Clode*

**Plane Strain and Three-Dimensional Coupled Thermomechanical
Simulation of the Conform Process** 505
Xavier Velay and Terry Sheppard

**The Structure and Development of a Computer Model to
Simulate the Conform Process** 519
Brian Maddock

Axisymmetric Modeling of Aluminum Extrusion Using an Expansion Chamber 533
Xavier Velay and Terry Sheppard

TEMPERATURE CONTROL

**Advanced Process Temperature Monitoring and Control
System (APTMC System)** 541
Bernhard Steinert

Closed-Loop Isothermal Extrusion 549
Jan Ingvorsen

Temperature Controlled Container Heating-Cooling Systems 559
Wolfgang Eckenbach

**Continuous Control of Thermodynamic Temperature in Extrusion,
Rolling, and Forging of Aluminum Alloys** 565
E.D. Glazman, R. Goshen, T. Kornfeld, S. Levy, and H. Damir

Complete Extrusion Press Control Thermometry — A Reality at Last 571
Stuart F. Metcalfe, Andrew D. Tune, and Paul Wright

BILLET HEATING	
Extrusion Furnace Technology	577
<i>Christopher Emes</i>	
A Novel Gas-Fired Plant for Fast Heating of Light Metal Billets using High Convection Technology	581
<i>Thomas Kramer</i>	
PROFILE MEASUREMENT	
The Application of Geometric Acquisition Devices (GAD) for Process Control in the Aluminum Extrusion Industry	589
<i>Chaim Rotsztein and Shmaya Wallfish</i>	
Using Digital Scanning Techniques for Inspection of Extruded Profiles	595
<i>John Stackhouse and K. Netzel</i>

BILLET PROCESS AND EQUIPMENT

Comparison of the Extrusion Performance and Product Characteristics of Three Structural Extrusion Alloys: AA6061, AA6082, and AA6005A	1
<i>Nick Parson, Jeff Hankin, Kevin Hicklin, and Chris Jowett</i>	
Optimized 6xxx Alloy Billet Performance: A Structured Approach	13
<i>Ravi Shahani, Roland Tirard-Collet, and Christophe Sigli</i>	
METALLURGY	
The Mechanism of Pick-Up Formation on 6063 Aluminum Alloy Extrusions	23
<i>T. Minoda, H. Hayakawa, S. Matsuda, and H. Yoshida</i>	
The Control of Precipitation in the Billet for Higher Extrudability of Al-Zn-Mg-Cu Alloys	31
<i>S. Matsuda, T. Furuyama, and H. Yoshida</i>	
METAL TREATMENT AND ALLOYING	
Rigorous Metallographic Technique for the Examination of Cast and Homogenized 6xxx Log Cross Sections	37
<i>Roger N. Wright, Metin Usta, Norman Gendron, and Stephen Bartolucci</i>	
Procias: The Application of Experimental Design Techniques to Optimize the Quality of an Aluminum 6005 Alloy Melt	41
<i>Marc Ryckeboer, Francois De Schutter, and Johan Verwimp</i>	
Dissolution of Iron in Aluminum Melt	47
<i>Young E. Lee and Stephen L. Houser</i>	
Recent Experience with the Alcan Compact Degasser in Billet and Continuous Casting	57
<i>Martin B. Taylor, Cees Castellijns, Peter Flick, and Ronald D. Adams</i>	

CASTING/HOMOGENIZATION

An Update on the Aluminum Association's Molten Metal Safety Program 65
Seymour G. Epstein

**Quantitative Analysis of the Homogenizing Heat Treatment by Means
of Al-Fe-Si Particle Analysis and the Effect on Productivity** 69
K.E. Nilsen and P.T.G. Koenis

Cooling Water Circulation Core for Casting Hollow Ingots 77
Takahiko Ichiki

An Overview of Aluminum D.C. Billet Casting 85
M.R. Jarrett, E.D. Manson-Whitton, and W.H. Neilson

HOMOGENIZATION

**Effect of Intermetallic Compound Distribution on Extrusion
Surface in 6061 Alloy** 99
*Hideaki Matsuoka, Yoshikazu Katoh, Masashi Sakaguchi,
Takashi Oka, and Masakazu Hirano*

**Effect of Homogenization Cooling Rate and Microstructural Features
of Al-Mg-Si Billets on Extrudability and Section Properties in the T5 Temper** 105
Jan Richert, Maria Richert, Janina Woznicka, and Zygmunt Stec

**Continuous Homogenizing of 6xxx Alloy Aluminum Extrusion
Billets at Alcoa-Intalco Works** 115
Nikolas W. Winjum, Guy W. Newsted, and Andrew R. Beevis

An Improved Load Car Design for Log Homogenizing 125
William Weyand

FURNACES

**Combustion System Design Impact on Stack Emissions-
Comparison and Evaluation** 131
Mark R. Young

Recent Trends in Billet Casthouse Furnace and Casting Equipment 137
Christopher Emes

New Melt Technology for Aluminum Recycling 143
Chris T. Vild and Jan H.L. van Linden

**Meeting Emission Standards While Maintaining Product Quality
and Production Throughput** 149
Robb Jackson, David Smith, and Marko Bruinsma

DIE DESIGN AND TECHNOLOGY

FEM Simulations of Aluminum Extrusion using an Elasto-Viscoplastic Material Model	157
<i>J. Lof, G. Klaseber, J. Huétink, and P.T.G. Koenis</i>	
Modeling of Metal Flow for Bearing Design	169
<i>Xinquan Zhang and John Heathcock</i>	
MODELING	
Case Studies on Control of Metal Flow in Pre-Chamber Dies	177
<i>Igor Duplančić, Miho Mluc, and Zoran Bracic</i>	
Computer-Based Design of Extrusion Tools	187
<i>Alfred Raggenbass and Josef Reissner</i>	
Application of FEM Modeling to Simulate Metal Flow Through Porthole Dies	195
<i>Joachim Gasioreczyk and Jan Richert</i>	
Numerical Modeling of Three-Dimensional Aluminum Flow in Extrusion Dies	203
<i>Stefano Sibilla and Arturo Baron</i>	
FEM Simulations of the Material Flow in the Bearing Area of the Aluminum Extrusion Process	211
<i>J. Lof, J. Huétink, and K.E. Nilsen</i>	
Improving Flow in Soft-Core Bimaterial Billets	223
<i>Alexander R. Bandar, Wojciech Z. Misiolek, Kevin E. Kloske, and Tae Ho Jeong</i>	
3-D Modeling Strength of an Industrial Porthole Die	229
<i>Emmanuelle Sarrazin, Jean-Pierre Cescutti, Jacques Alexandre, and Bruno Magnin</i>	
Layered Extrusion Dies – Is there a Need for Rapid Tooling?	239
<i>Wojciech Z. Misiolek</i>	
Development of a 3-D Die Design Tool for Aluminum Extrusion	245
<i>K.E. Nilsen, P.T.G. Koenis, F.J.A.M. van Houten, and T.H.J. Vaneker</i>	
DESIGN	
New Process of Manufacturing of Stepped Extrusion with Special Die Set Design	251
<i>Ebrahim Pourvali</i>	
Extrusion Die Technology—Meeting the Demand	255
<i>Ian Avent and Mike Cook</i>	

Innovative Extrusion Die with Two-Stage Mandrel for Close Tolerance Hollow Shapes	261
<i>Paul Robbins</i>	
The Metallurgy of the Extrusion Die	265
<i>Alan F. Castle</i>	
Weld Integrity on a Die	273
<i>Hanif Hamzah</i>	
DIE OPERATIONS	
Protect Your Press Tools	277
<i>James E. Dyla</i>	
The Contemporary Fixed Dummy Block: Its Design, Operation, and Maintenance for Maximum Productivity	283
<i>Paul Robbins</i>	
Integrated Die Management System—Key to Economical Efficiency of an Extrusion Plant	289
<i>A. Czelusniak, W. Lilliental, and G. Tymowski</i>	
Improving Extrusion Performance and Quality by Utilizing Die-Splitting and Die-Polishing Systems in the Die Shop	295
<i>John Stackhouse and Ozren Kuzmanovic</i>	
TREATMENT	
How PVD Coatings can Increase Life and Improve Die Performance in Aluminum Extrusion	305
<i>Michael J. McCabe</i>	
The Development and Application of a New, Low-Temperature Surface Hardening Process for Extrusion Tools	311
<i>Ray Reynoldson</i>	
Optimization of Nitriding Parameters for Extrusion Dies, Evaluated in an Extrusion Simulation Test	317
<i>Thomas Björk, Jens Bergström, and Sture Hogmark</i>	
VALUE ADDED	
A Low-Cost Method of Manufacturing Internal Combustion Engines using Extruded Aluminum	327
<i>Peter Savage, Evan Bydder, and Peter Witehira</i>	
FINISHING	
Defect Analysis in Anodizing	335
<i>Barry R. Ellard</i>	

New Finishes for Extrusions: Multicolour Electrolytic Colors for Anodized Aluminum and Their Latest Developments	353
<i>Walter Dalla Barba and Fabio Vincenzi</i>	
The Lightfastness of Anodized and Dyed Aluminum	363
<i>Mark Jozefowicz</i>	
Pretreatment Processes to Prevent Filiform Corrosion on Painted Extrusions	369
<i>Robin C. Furneaux, Barry R. Ellard, and Martin P. Amor</i>	
The Effect of Excess Silicon on the Brightening and Anodizing Response of AA6463 Extrusions	381
<i>Barry R. Ellard and Nick C. Parson</i>	
New Non-Chrome Conversion Coating for Aluminum	389
<i>Chris Hanthorn</i>	
FABRICATING	
Extrusion Pretreatments: Alternatives in Cleaning and Conversion Coating	397
<i>James T. Renshaw, Jr.</i>	
Nylon Abrasive Filament (NAF) Brushes – Compliant Tools for Deburring and Finishing Aluminum Extrusions	401
<i>Prasad S. Mahadev</i>	
Direct Rounding of Profiles During Extrusion	415
<i>Alexander Klaus, Dieter Arendes, Sami Chatti, and Matthias Kleiner</i>	
MARKETING AND MANAGEMENT	
Why Go for Aluminum Extrusions?	421
<i>Mario Conserva</i>	
Development of Value Added Extruded Products in the Rail, Shipbuilding and Electrical Markets, Supported by Finite Element Analysis (FEM)	439
<i>Johannes Gönner and W.C. Verloop</i>	
Aluma-Strut – The New Shape of Framing	445
<i>Ronald H. Trafton</i>	
PROCESS CONTROL	
Considerations for Total Pollution Control: Energy Conservation and Process Control Utilizing Covered Tanks	449
<i>Kenneth C. Hankinson, Tom Brady, and Adam Chmielewski</i>	
Process Control and Data Acquisition for Pretreatment Washer Systems Utilizing Computerized Graphics	455
<i>Timothy Fudge and Brent Theiling</i>	

Product Development Via Process Control and Complete Integration with Customer	461
<i>J.P. Singh</i>	

DESIGN AND FABRICATION

Structural Design of Aluminum Extrusions with ADS Software	465
<i>J. Randolph Kissell</i>	

The What, Where, and How of Friction Stir Welding	469
<i>Stefan Stoltz</i>	

Friction Technology for the Aluminum Industries	473
<i>Wayne M. Thomas</i>	

Increasing Packing Department Productivity and Quality	485
<i>Mark A. Machcinski</i>	

Technological Breakthroughs: New Fabrication/Processing Technologies for Aluminum Extrusions Long Desired by the Markets	489
<i>Hirozo Michisaka, Mitsunobu Matsumura, and Mitsuo Hattori</i>	

Aluminum Extrusion and Hydroforming: A Convergence of Technology	495
<i>Dirk Sliwinski</i>	

PUBLISH ONLY
